Surface Preparation

Surfaces must be clean, dry and free from grease, dust and frost. Extrude Décor Adhesive with a caulking gun to one of the parts and join by pressing forcefully and evenly. The parts may be repositioned within 5 minutes.

At least one of the surfaces must be porous. On skirting boards and tiles apply to glue points, on beads and panels apply to "X", in straight or wavy strips, to better develop the initial grip. It is not recommended for use on unpainted surfaces, on bituminous surfaces, for applications in permanent contact with water or with humidity.
