### **Features**

- Easy to use, hand-mixable
- Easy-to-shape consistency
- Permanent bond

# **Surface Preparation**

Surfaces must be clean, dry and free of grease, dust, oil and any contaminant to ensure that the bonding process is not compromised.

#### Instructions

- Cut off required amount of DYNA-FIX® QUICK FIX EPOXY PUTTY and mix for at least one minute
- Press the putty onto the surface and apply pressure for 15 minutes at least. Excess can be removed using a wet tool
- Product will harden like metal after 3 to 5 minutes
- Repaired water systems can be put back into service after 60 minutes. Full cure is achieved after 24 hours

## **Technical Data**

Property	Unit	Value
Work Life (24°C)	Min	3 - 5
Lap Shear Strength on Concrete	MPa	6.2
Compressive Strength	MPa	55
Temperature Resistance	°C	120 Continuous 150 Discontinuous
Shore D Hardness	18 11	75
Shrinkage	%	<1
Water Resistance	-/-	Good

## **Shelf Life**

24 months from date of production, when stored at or below 25°C in the original unopened container

# **Packaging**

• 57 g stick

Designed & Manufactured According to AFAQ ISO 9001:2015 Certified Quality Management System

The information is offered in good faith and is believed to be accurate. It should not however be used in substitution for customer's tests to ensure that DYNA-FIX® products are safe, effective and compatible for the intended use. Sole warranty is that the product will meet the DYNA-FIX® sales specifications in effect at the time of delivery. Your exclusive remedy for breach of such warranty is limited to refund of purchase price or replacement of any product shown to be other than as warranted.
